Resolution before the Lake Merced Task Force

Whereas, the LMTF Ad Hoc Master Plan Committee identified issues to be analyzed in developing a plan,

Whereas, the LMTF Ad Hoc Master Plan Committee thinks many of the Lake Merced reports provide the basis for many of the plan issues,

Whereas, the LMTF Ad Hoc Master Plan Committee recommended that a consultant conduct a "gap analysis" to identify areas for further analysis in the development of the plan,

Whereas, the LMTF applied for and received a \$5,000 grant channeled through the Park Trust from San Francisco Beautiful to conduct the gap analysis,

Whereas, a portion of the Coastal Conservancy grant for trail feasibility and related transportation studies conducted by the urban, recreation and master plan consultant firm, MPA,

Whereas, MPA is familiar with Lake Merced reports they were asked to estimate the cost of the gap analysis that became the basis for the SF Beautiful grant proposal,

Therefore, be it resolved that the LMTF request the Park Trust to contract with MPA to conduct the gap analysis.
